He noted that the financing term is expected to be 30 years but not to exceed 35 years.

Trustee Sarnoff stated that he would only support the Project if it consisted of $55M in total funding.

A motion was made and passed that the FIU Board of Trustees authorize a request to the Board of Governors to request the Division of Bond Finance of the State Board of Administration to issue revenue bonds on behalf of Florida International University to finance construction of a Student Residence Facility on the Modesto A. **Welcome and Introduction**
Chair Puig described the goals of the Workshop and explained that the agenda would focus on topics critical to the University’s advancement. She introduced and welcomed State University System of Florida Board of Governors (BOG) Chancellor Marshall Criser III and BOG Chair Thomas G. Kuntz.
Discussion with State University System of Florida Board of Governors

Chancellor Criser stated that the BOG is committed to guiding the State University System (SUS) and that in terms of performance funding, the BOG has engaged the SUS institutions in a continued dialogue and collaboration to ensure that the universities are accountable for meeting specific State needs, as well as for meeting targets of quality and efficiency.

Chancellor Criser presented a comprehensive review of performance funding guiding principles, key components of performance metrics and scoring, and System and university performance funding investments. He noted that a number of System institutions did not meet targets on metrics related to: improving retention and graduation rates; increasing STEM degree production; and lowering average cost per undergraduate degree. He presented data that illustrates how these issues compare among the System institutions. He then led a discussion on performance based funding and maintaining quality in years of declining State resources.

Trustees discussed University challenges such as serving a large percentage of economically disadvantaged students where many must hold full- or part-time employment.

Trustee Marc D. Sarnoff noted that the continued funding decreases to Bright Futures Scholarships directly impact student financial burdens. He inquired as to whether the BOG makes recommendations to the Legislature relating to Bright Futures Scholarships. Chancellor Criser noted that while qualification standards are set by the Legislature, the BOG does advocate for need-based support.

Trustee Alian Collazo discussed the high economic and social costs associated with student loan debt and inquired as to the BOG’s position on growing student debt trends in terms of time to degree completion. Chancellor Criser and Chair Kuntz discussed the need to implement early and intrusive intervention programs and strategies that shift the focus from student recruitment to degree completion.

Trustee Kathleen L. Wilson noted that the FIU Faculty Senate is committed to and actively participates in the shared vision of student success, stating that the Student Learning and Success Committee of the Faculty Senate was formed in March 2016 in order to begin planning and implementing activities to foster a culture of engagement and ownership among faculty for academic student success.

Trustee Gerald C. Grant, Jr. mentioned that Trustees share in the responsibility for student success, adding that the University is not only committed to the metrics but is also committed to remaining accountable to the community it serves. He indicated that Panther Alumni Week continues to provide the platform for cultivating relationships that foster personal and professional growth among students.

On behalf of the Board, Chair Puig thanked Chair Kuntz and Chancellor Criser for their contributions to the Workshop and for their respective support of the University.
University President Mark B. Rosenberg presented rankings and other indicators that articulate the University’s distinctiveness. He noted that FIU is the largest majority minority research university, is ranked by Forbes as one of best large employers in the United States and in Florida, and is ranked #7 on the Social Mobility Index created by CollegeNET. He added that FIU graduates command a starting salary of $36,900, which is the highest among the SUS employment. He indicated that 75.7% of FIU Bachelor’s graduates have full time-employment or are continuing their education one year after graduation, adding that this is among the highest in the SUS.

President Rosenberg stated that the University remains committed to providing quality learning, state-of-the-art research, and problem-solving engagement.

**Institutional Priorities**

Chair Puig noted that each Trustee has been provided with an overview from the Association of Governing Boards of Universities and Colleges (AGB) on Board and Trustee Responsibilities. She requested that Trustees review in order to frame future discussions of the Board on characteristics of strategic governance.

**Wrap-Up**

Chair Puig thanked the Trustees for their contributions to the Workshop.

With no other business, Board Chair Claudia Puig adjourned the Florida International University Board of Trustees Workshop on Friday, March 24, 2017 at 1:00 p.m.

Subject: Program Termination: Bachelor of Science in Statistics

Proposed Board Action:
Terminate the Limited Access Bachelor of Science in Statistics (CIP 27.0501).

Background Information:
FIU closely monitored this low performing degree from 2011 to 2015. In 2015-16, the Department of Mathematics and Statistics redesigned the BS in Mathematics to become a BS in Mathematical Sciences. This allowed for the creation of a new statistics major within the restructured degree. The proposal to terminate the Bachelor of Science in Statistics will remove a low performing degree from our inventory.

Section (1c) of Florida Board of Governors Regulation 8.012 — Academic Program Termination and Temporary Suspension of New Enrollments states it is the University Board of Trustees responsibility and authority to approve termination of degree programs.

Subject: New Program Proposal: Bachelor of Science in the Internet of Things

Proposed Board Action:
Approve the Bachelor of Science in Internet of Things (CIP 15.999) new program proposal.

Background Information:
The Department of Electrical and Computer Engineering in the College of Engineering and Computing at Florida International University is proposing a new Bachelor of Science degree in Internet of Things (IoT).

The IoT is a 120-credit undergraduate online degree and will be the first of its kind within the SUS and the nation, removing the Calculus I/II and Circuits requirements from the traditional engineering curriculum. According to a new Gartner forecast, 8.4 billion IoT devices will be in use worldwide this year — an increase of 31 percent from 2016. The IT research firm expects that number to reach 20.4 billion by 2020. This will require a sheer number of skilled undergraduates in hardware, embedded programming, cybersecurity and communications, who can join the future cyber workforce. In addition to tremendous employment opportunities, the proposed IoT program also would serve as a pipeline for graduate education into our online MS in Network Security and MS in Cybersecurity degree program jointly with School of Computer Science.

Each university board of trustees shall approve for implementation new degree programs at the bachelor’s, master’s, advanced master’s, and specialist levels in accordance with sections (3) and (5) of Florida Board of Governors Regulation 8.011 – Authorization of New Academic Degree Programs and Other Curricular Offerings.

Subject: New Program Proposal: Doctor of Athletic Training

Proposed Board Action:
Approve the Doctor of Athletic Training (CIP 51.0913) new program proposal.

Background Information:
The Department of Athletic Training in the Nicole Wertheim College of Nursing and Health Sciences at Florida International University is proposing a new Doctor of Athletic Training (DAT). The proposed DAT is a two-year program that will provide post-professional education and advanced evidence-based clinical practice experience to athletic trainers with a focus on injury/illness prevention and entrepreneurial leadership. The DAT is a 48-credit, stand-alone degree plan of doctoral study for athletic trainers previously certified through the National Athletic Trainers’ Association (NATA) Board of Certification who seek advanced athletic training education and clinical skills on the doctoral level.

The DAT program will offer the majority of the curriculum in an online format and is a professional doctorate-level education program that meets the post-professional education needs of athletic trainers to enhance patient-centered care, outcomes, and quality of life for patients and physically active individuals across the lifespan.

The Bureau of Labor Statistics reports that employment of athletic trainers is projected to grow by 21% from 2014 to 2024. The proposed DAT program is uniquely positioned to assist in meeting statewide, as well as national, professional, and workforce needs. FIU was the first to develop and implement the MS-AT degree program in the state of Florida. FIU can continue to be on the forefront of athletic training education by developing and implementing the first DAT degree program in the southeast region and be one of only five programs nationwide.

Each university board of trustees shall approve new research and professional doctoral degree programs for submission to the Board of Governors for authorization, in accordance with the criteria outlined in section (3) of Board of Governors Regulation 8.011 – Authorization of New Academic Degree Programs and Other Curricular Offerings.

Subject: Approval of Amendment to the 2010-20 Campus Master Plan for the Modesto A. Maidique Campus to Accommodate the Construction of a Hotel, Conference Center, Alumni Center and Parking; and Approval of Terms of the Ground Lease Associated with the Hotel, Conference Center, Alumni Center and Parking; Authorize the President or his designee to undertake all steps necessary or desirable to complete the Ground Lease and all documents related to the Project.

Proposed Board Action:
Approve an amendment to the Campus Master Plan for the Modesto A. Maidique Campus (“MMC”) to accommodate the construction of a Hotel, Conference Center, Alumni Center and Parking; and approve the terms of the Ground Lease and other key terms associated with the Hotel, Conference Center, Alumni Center and Parking (the “Project”).

Background Information:
Approval of Amendment to the 2010 Campus Master Plan for the MMC Campus: The 2010-20 Campus Master Plan currently shows the approved location of a Hotel on the north part of the MMC campus, just east of the entrance at SW 112th Avenue, south of SW 8th Street, north of SW 10th Street, and west of Parking Garage 6. The 2010-20 Campus Master Plan shows the approved location of an Alumni Center and Conference Center on the southeast corner of campus, just east of Blue Garage and south of SW 16th Street on current Parking Lot 4.

As part of the Invitation to Negotiate competitive solicitation process for the design, development, construction, and operation of a Hotel, Conference Center, Alumni Center and Parking (the “Project”), a single site on the north side of campus allows for design and construction savings and for greater visibility of the Project. The proposed site, containing approximately 5.21 acres, is located on the north part of the MMC campus, just east of the campus recreation field, south of SW 8th Street, north of SW 10th Street, and west of Henington Island.

The amendment to the 2010-20 Campus Master Plan addresses the Land Use Map (4.1A), Recreation and Space Map (8.1), and Conservation Map (13.1).

Approval of Terms of the Ground Lease and other related agreements of the Project: FIU has explored the construction of a hotel, conference center, and alumni center for approximately 10 years. FIU’s 2005-15 and 2010-20 Campus Master Plans for the MMC campus and 5-year Capital Improvement Plans have reflected these projects. A hotel and conference center will serve the accommodation and conference needs of visitors, faculty, researchers and the community by providing an appropriate venue for academic, research and professional conferences; meeting and seminar rooms for symposia and career fairs; and special events, weddings, award ceremonies, and speakers series. An alumni center will be a place for alumni to call home, create affinity, and encourage alumni to mentor students and assist them with jobs, professional and leadership development and internships. By incorporating the alumni center into the hotel...
and conference center, design and construction efficiencies are achieved, particularly eliminating the need to have separate conference facilities in the alumni center that were originally envisioned.

Initial and updated feasibility studies were completed in 2008, 2013 and 2015 and a task force was appointed by the University President to evaluate and assess the need and opportunities for the Project in 2014. Jones Lang LaSalle, external consultants, were hired in 2015 to review and assess prior studies, including project cost and amenity needs. On June 4, 2016, the FIU Foundation Board of Directors approved funding of $6.8 million from cash and direct investment for the support of the alumni center. Also in 2016, an evaluation committee and a subject matter expert committee were established and an Invitation to Negotiate was issued, with four developer proposals submitted November 2, 2016 as part of the step-one qualifications based segment of the ITN. Three developers were shortlisted as part of the step-two technical segment of the ITN. The joint meeting of the evaluation and subject matter expert committees heard the formal presentations of each of the three developers on April 10, 2017 and the evaluation committee heard updated presentations on April 11, 2017. One of the three developers withdrew subsequent to the April 11, 2017 presentation meeting as the developer did not believe they could meet all of the program requirements. The evaluation committee received updated presentations by the two developers on May 12 and May 15, 2017. Best and Final Offers were received on May 24.

The evaluation committee has recommended that the proposal from Concord Benchmark, LLC (the “Developer”) be accepted as providing the greatest benefits to FIU and best fulfilling the requirements of the ITN. The Senior Vice President for Finance and Administration/CFO and the Senior Vice President for University Advancement and Chief Executive Officer of the FIU Foundation have reviewed all of the supporting materials and concur with the recommendation of the Committee. The President of the University has also review the supporting materials and concurs with the recommendation of the Committee.

The summary of key terms articulating all of the essential and required terms and conditions of the Project are presented for approval. The Florida International University Board of Trustees (BOT) Finance and Facilities Committee reviewed the Project and recommended BOT approval at its June 1, 2017 meeting. In addition to the key terms presented, the Finance and Facilities Committee incorporated the following three additional terms as part of its approval:

- FIU receives the first right of refusal to purchase the Project in the event the Project is sold
- FIU receives the right to receive and audit the financial statements associated with the operation of the Project
- FIU limits the grace period during which no ground rent is paid to FIU to no more than 24 months after execution of the Ground Lease

FIU has been working with staff at the Board of Governors (“BOG”) and the Florida Division of Bond Finance (“DBF”) early in the process. Upon approval by the FIU BOT, the summary of terms will be submitted to the BOG and DBF for their review. It is anticipated that the BOG will consider the request at their August 2017 meeting. Approval will also be sought by the Trustees of the Internal Improvement Trust Fund (“TIITF”) since the Project will require approval of the sub-lease of the land from TIITF. The Project is in compliance with FIU and BOG Debt Management Guidelines and BOG Public Private Partnership Guidelines.
Legal Authority:

Florida Statute 1013.30 authorizes the university boards of trustees to adopt campus master plans and amendments related thereto. The master plan identifies general land uses and addresses the need for and plans for provision of roads, parking, public transportation, solid waste, drainage, sewer, potable water, and recreation and open space during the coming 10 to 20 years. The university BOT is authorized by Florida.
